

# NutriGrow

## Premium Light Compost

This light, nutrient-rich compost is ideal for boosting and maintaining plant health over time. In combination with Arrow Transportation Services, we offer our NutriGrow composts to clients across Western Canada. This cost-effective, high quality, organic compost is a great fertilizing solution for many Canadian farmers.

### Usage

As a mulch, apply a 1" to 3" layer on top of soil around plants or as a general mulch throughout planted areas. Mulching enhances soil quality, retains moisture and suppresses weeds. As an amendment, blend at a ratio of 1-part compost and 3-to-5 parts existing soil or other soil-building ingredients. Amending soil with nutrient and organic-rich compost greatly improves overall soil quality.

As a topdress on lawn areas, apply a 0.25" to 0.5" layer uniformly across the lawn and rake to incorporate. Topdressing lawns improves the texture and colour of grass through the addition of slow-release nutrients and retention of moisture.

Premium Light Compost	Soil Properties				Nutrients				
	Organic Matter	Moisture	C:N	pH	Total Nitrogen	Nitrate-N	Ammonium-N	Available Phosphorus	Available Potassium
	%	%	ratio	units	%	mg/kg	mg/kg	mg/kg	mg/kg
	62.5	30	13:1	7.14	2.07	62	430	1200	8,600
