# Premium Organic Compost

NutriGrow Premium Organic compost blend is certified by the Organic Materials Review Institute (OMRI) with no restrictions for application on organic certified farming operations. This aesthetically pleasing 1/2" screened compost is produced in a carefully managed boutique process to ensure the product meets the specific needs of certified organic users. NutriGrow Premium Organic compost is a fully stable compost that cures for more than 18-months before end-use applications. Popular with our vineyard clients as this is some of the best compost available in BC.

## Usage

As a mulch, apply a 1" to 3" layer on top of soil around plants or as a general mulch throughout planted areas. Mulching enhances soil quality, retains moisture and suppresses weeds. As an amendment, blend at a ratio of 1-part compost and 3-to-5 parts existing soil or other soil-building ingredients. Amending soil with nutrient and organic-rich compost greatly improves overall soil quality.

As a topdress on lawn areas, apply a 0.25" to 0.5" layer uniformly across the lawn and rake to incorporate. Topdressing lawns improves the texture and colour of grass through the addition of slow-release nutrients and retention of moisture.

Premium Organic Compost	Soil Properties				Nutrients				
	Organic Matter	Moisture	C:N	pH	Total Nitrogen	Nitrate-N	Ammonium-N	Available Phosphorus	Available Potassium
	%	%	ratio	units	%	mg/kg	mg/kg	mg/kg	mg/kg
	39.2	41.1	18:1	7.45	1.38	446	275	1900	315
